Experiences (Total - 2 Years +)

1. Software Developer at Longbitz (January 2025 – March 2025, (*INTERN*))

Key Contributions:

- Assisted in developing and maintaining scalable applications for reliable performance
- Fixed critical bugs, improving system stability and reducing downtime.
- Authored clear and detailed technical documentation to streamline onboarding and future maintenance.

Technologies Used: Vue.Js, Tailwind CSS, Redux, Shadcn, Git

2. FrontEnd Engineer at Next Level Bangladesh (April 2025 – 31 August 2025)

Key Contributions:

- Delivered high-priority frontend features under tight deadlines with CTO
- Implemented pagination on large datasets, reducing load time by 40%.
- Built **reusable** UI components (modals, forms) to reduce duplication and improve maintainability
- Reviewed PRs to ensure clean, efficient, and maintainable code.
- Fixed UI/UX bugs, improving dashboard usability for 1000+ users

Technologies Used: React.js, Bootstrap, Redux, JavaScript (ES6+), Node.js, Express.js, MongoDB, Git

3. Software Engineer at SOFOF Tech (August-2025 - Present)

Key Contributions:

- Collaborated closely with the backend team to ensure smooth and efficient integration.
- Delivered high-priority frontend features within tight deadlines without compromising quality.
- Designed and implemented unique UI/UX solutions independently, without relying on Figma or predefined designs.
- Built AI-agent-based frontend websites from scratch with a strong focus on usability and performance.
- Worked closely with backend developers to integrate complex and large-scale APIs.
- Developed a real-time voice communication widget using the LiveKit framework.
- Actively fixed bugs and supported other developers with Git-related issues.
- Contributed to multiple projects including SaaS platforms, CRM systems, and other web applications.

Technical Skills

Language : Javascript, Typescript, Python(basic), C, C++, Node.JS, ,mysql, HTML

Frontend : React (React Query, Axios, hook-form), Next.Js, Nuxt.js(basic), Tailwind, Bootstrap Shadcn, Firebase

Backend : Node.js, Express.js, MongoDB, Nest.js, NeonDB, PostgreSQL

CC : OOP , Algorithms

SM : Context-api, Redux, Zustand,

Tools : Git, Vs code, Netlify, Chrome Dev, Figma, Vercel, Postman, webstrom, Slack, Trello

Projects

1. Flowmate (Team project) [Live-site Link](#) | [Client-site Code](#) | [Server-site Code](#)

Project Overview –

- This project is about Team Collaboration like Trello.
- In this project admin can provide tasks individually.
- The user can create a team, he also can see his activity, he can attach a file and see this.

Technologies Used: React, Redux, Tailwind Css, React-beautiful-dnd, Node.js, Express.js, MongoDB

2. MorningStar [Live-site Link](#) | [Client-site Code](#) | [Server-site Code](#)

Project Overview –

- This newspaper site has two types of users. One is a normal user, another is a premium user.
- In the User Dashboard, a user can publish a newspaper and see its home page.
Admin Credential - email (robin@gmail.com), pass - (Robin01.)

Technologies Used: React.Js -(Tanstack-query), Tailwind CSS, MerakiUI, AOS, Firebase, Node.Js, Express.Js, MongoDB

3. Japanese Language [Live-site Link](#) | [Client-site Code](#) | [Server-site Code](#)

Project Overview —

- This project is about learn japanese language
- Here user can read word meaning,lesson & admin add vocabularies,lessons,manage the users
Admin credential - email - (phero@gmail.com) , pass - (Phero01.)

Technologies Used: React Js,Tailwind CSs,Framer Motion,Firebase,Node.js,Express.js,MongoDB,Mongoose

Education : Bachelor of Science (B.Sc.) in **CSE** (Honours)

Certificate : Complete Web Development Course with Jhankar Mahbub (completed - [certificate](#))

Language : Bangla - native, English - comfortable
